DETAILED ACTION

Claim Objections

1. **Claim 26** is objected to because of the following informalities: "a rotating race engagement surface" should read "a pair of rotating engagement surfaces" in line 1. Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

3. **Claim 22** recites the limitation "bottom surfaces" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. **Claims 1-34** are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 5,558,491 to Andrews.

Art Unit: 3676

In response to **claims 1-13**: Andrews discloses a seal (10) for use with a rotating surface (22) and a stationary surface (21) comprising a ring (14), first race, second race and a plurality of roller bearing elements substantially as claimed (see attachment). The first race defines a recess (29) therein where the second race and bearing elements are disposed.

In response to **claims 14-25**: Andrews discloses an apparatus (Fig. 1) comprising a stationary housing (21), rotor (23), ring (14), first bearing race, second bearing race, bearing cage, and bearing elements as claimed (see attachment). The first bearing race defines a recess (29) therein where the second bearing race, cage, and bearing elements are disposed.

In response to **claims 26-34**: The reference discloses applicant's invention substantially as claimed (see attachment).

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: U.S. Patent No. 5,690,341 to Prough et al., U.S. Patent No. 5,865,597 to Ozawa, and U.S. Patent No. 6,186,510 to Reagan.
